NOTICE TO RESIDENTS – CHARGING OF ELECTRIC VEHICLES (EVs)

The use of communal power in basement parking areas **is not** to be used for the purpose of charging EVs. Those residents with EVs need to plan on charging their vehicles off-site at locations available throughout the Cairns region.

The Body Corporate Committee (BCC) of The Keys is currently in the process of commissioning our on-site EV charging station. The Keys is at the forefront of apartments on the northern beaches to have EV facilities available on-site for those residents who have an EV or intend purchasing an EV. Finalisation of the commissioning process still requires further programming work to be undertaken. A timeline for completion of these additional programming works is not yet determined. When the charging station is fully commissioned, updated advice will be provided along with a guide on how the EV system works.
